

AWS IAM Activity

Trainer: Jerry Bame

Instruction: Perform the following tasks using the AWS Management Console and AWS CLI.

- **Creating IAM Groups:** [*Use the AWS Management Console*]
- Create two IAM groups named 'Finance' and 'HelpDesk'.

Attaching Policies to Groups: [*Use the AWS Management Console*]

- Attach the 'AmazonS3FullAccess' policy to the 'Finance' group.
- Attach the 'AmazonEC2FullAccess' policy to the 'HelpDesk' group.

Creating IAM Users: [*Use the AWS CLI*]

- Create four IAM users: John, Mark, Sakali, and Dzem.
- The users should have access to the AWS Management Console.
- Additionally, John and Sakali should have access to the AWS CLI using their Access Keys

Adding Users to Groups: [*Use the AWS CLI*]

- Add John and Dzem to the 'Finance' group.
- Add Sakali and Mark to the 'HelpDesk' group.

Verification: [*Use the AWS CLI and AWS Management Console*]

- Verify that users in each group have the correct permissions inherited from their group.
